Deletist, a free application for Windows, allows you to delete multiple files and folders at once. Its creators recommend using it if you accidentally delete a file and want to restore it, or if you want to wipe the Windows recycle bin to reclaim space on the disk. When you hit the Home key, you'll see a Quick [List] window that displays the full paths to all your deleted items (Files and

---

Folders). This allows you to quickly see all the files and folders on your drive that you would have deleted. This will give you an opportunity to access your deleted files. To delete multiple files or folders (selected or not selected), just select and press Enter, or simply drag and drop them to the List window. You can even select all files or folders, invert the selection, or remove from the list, if any. Deletist will tell you how many deleted

---

items were successfully erased, how much space was reclaimed, and any errors that were encountered.

Deletist is safe and easy to use. It won't damage your system, and does not save any information on your hard drive. You can configure it to automatically erase items from the Recycle Bin.

Deletist is a free application for Windows. You can install it on your desktop or anywhere else you want.
